

Full Stack Developer (Node.js, Express, React, TypeScript)

Phone: [Your Number] | Email: [Your Email] | LinkedIn: [Your LinkedIn] | GitHub: [Your GitHub]

Professional Summary:

Full Stack Developer with over 8 years of experience building robust web applications using JavaScript, TypeScript, Node.js, Express.js, React.js, MongoDB, and RESTful APIs. Proficient in backend architecture, frontend component design, API security (JWT, OAuth), and cloud deployment strategies. Experienced in both monolithic and microservice architectures across industries such as Finance, Healthcare, and Banking.

Technical Skills:

Languages	JavaScript (ES6+), TypeScript, HTML5, CSS3
Backend	Node.js, Express.js, REST API, JWT, Multipart, bcrypt
Frontend	React.js, Redux, HTML5, CSS3, Bootstrap, Tailwind
Database	MongoDB, Mongoose, PostgreSQL, MySQL
Tools	Git, GitHub, Postman, Swagger, Docker, VS Code
Testing	Jest, Supertest, React Testing Library
Deployment	Render, Vercel, Railway, Netlify
Cloud	AWS (EC2, S3), GitHub Actions, Jenkins
Methodologies	Agile, Scrum
Architecture	MVC, Microservices, SPA, Component-based UI

Professional Experience:

Client: Global Payments (TSYS)

Role: Senior Software Engineer (Full Stack) | Mar 2023 – Present

- Built Payment and Reporting System with React.js frontend and Node.js + Express backend.
- Created RESTful APIs with Express, MongoDB, and Mongoose for financial transactions.
- Implemented server-side logging, API versioning, and error handling using middleware.
- Developed admin dashboard with React Router, Redux, and protected routes using JWT.
- Reviewed PRs and ensured best practices for performance and security (CORS, Helmet).

Company: Workllama, GA

Role: Full Stack Developer | Jun 2021 – Mar 2023

- Developed enterprise-grade microservices with Node.js, TypeScript, and Express.
- Designed API endpoints for user management, messaging, and notifications.
- Used Kafka and Redis for message queues and real-time updates.
- Frontend SPA using React.js and Tailwind CSS integrated with backend APIs.
- Worked with Docker and Kubernetes for scalable deployments.

Client: CVS Health Care, AZ

Role: Full Stack Developer | Nov 2019 – May 2021

- Developed and maintained health-related web apps using React.js and Node.js.
- Consumed SOAP and REST APIs in frontend using Axios and displayed reports with Chart.js.
- Developed AWS Lambda functions to process insurance claims asynchronously.
- Integrated authentication using OAuth2 and JWT-based middleware.

Client: Harleystown Insurance, GA

Role: Full Stack Developer | Jan 2018 – Oct 2019

- Built REST APIs for claims processing and account services using Express.js and Mongoose.
- Built AngularJS-based UIs and later migrated components to React.
- Used AWS S3 for storing uploaded documents via Node backend.
- Wrote automated test cases with Jest and Supertest.

Client: First Republic Bank, NYC

Role: Backend Developer | Oct 2016 – Dec 2017

- Designed secure APIs for VMS system using Express.js, JWT, and role-based middleware.
- Built reusable utilities for DB interactions using Mongoose.
- Deployed on AWS EC2 and used GitLab CI for automation.

Company: Girmiti Software Pvt Ltd, India

Role: Junior Backend Developer | Mar 2015 – May 2016

- Collaborated on internal microservices using Express and MongoDB.
- Created scripts to automate deployment and testing of REST APIs.
- Wrote backend logic for file parsing and data validation routines.

Education:

Bachelor of Engineering in Computer Science — VTU, Karnataka, India (2014)
